## Leadership skills testimonials

Hi RobThanks for a wonderful few days last week with a leadership training of the Escalator program in Wellington. I learned so much. I find your teaching style great – simple, but full of examples, visual reinforcements, and even videos etc... Then we had to do some practical work on our own! As I've learned through the Escalator, I'm a multi-capital student, so it's the perfect reinforcement for me. I just wish I'd learned this many years ago but it was never too late. I appreciate all your practical experiences as well as the theories that sit behind these well-prepared sessions. - Ruth, Escalator Program, Agri-Woman Development TrustHanya wants feedback to you how helped me discover the Leadership workshop 101 last week. It's fair to say that my team here has seen a change in how we approach things. Have been really self-infertilized about working on my goals and taking you on your word to make direct changes. I can already see an increase in communication around laboratories and staff engagement. It's interesting watching their tentative steps to push themselves into areas where they feel they can't go as well as surprises on their faces when I ask them what kind of solution will work best for them! Early days but a lot of positives for me and my team. Also have feedback from others in the building saying they want to get this workshop so will follow up with my online manager here. - Grant, Manager, CanterburyRob District Health Board, thank you for starting me on a personal leadership/development journey this year through your session with MEM class. Your session challenged me emotionally and forced me to look at my behaviour - something I found very difficult (hardest class of the year) but equally rewarding when we did a second 'keep-start-stop' on Wednesday to see some starting to switch to keep. I find you engaged and connected easily with you, your ideas and messages, something that I sometimes have struggled with all year round with other lecturers. Now, on the cross streets, where my next adventure will take me I am grateful for the insight you've given me into the personal skills that people leaders need. And perhaps without meaning to you has made me question my path and widened my eyes into different fields. Helping others learn about leadership and growing into the best version of themselves is very attractive to me, now only to find where is appropriate in a tight and traditional world of civil engineering. thank you Take the time to support our classes. I look forward to meeting you on the day of our show in November. - Emily, Master of Engineering Management, University of Canterbury, 2016 Bethany Carlson, VP Relationship Management Robert Timmins, International Pilot Josh Resnick, Regulatory Utility Consultant Jessica Oetker, Neil Couslar Project Manager, UK Business Manager John Reid, Sloane Urwin Business Development Manager, Operations Manager Analyst Monica Banta, HR/Salary Specialist Michael Rocereta, Managing Partner katelin Anderson, VP Marketing &P; The design of Kaleen Haines, Administering HR Jamie Patterson Simes, Alaska Bush pilot Jayvin Tonn, Senior Auditor Jennie Stewart, Small Business Owner Scott Knutson, VP Technologies Champion Isaac Vanderburg, Associate National Director Nicole R.
